WORK EXPERIENCE

- **ChrisDev Limited**, Trinidad & Tobago April 2015 - Present

I am working as an Intern contributing in the Open Source and internal Projects of the company. The company works on Open Source technologies like Python/Django, Pandas, Ansible, PostgreSQL, Linux and contribute back to the community with its Open Source projects. The Collaboration Platform Github and Bitbucket are used for Development.

OPEN SOURCE CONTRIBUTIONS

- **Django-Pandas**
A tool for using the Python data analytics library Pandas in Django. The project has 130+ stargazers on Github. I worked on upgrading the library to latest version of Django which is 1.8. The Django 1.8 is the LTS release with lots of new features and bug fixes. I improved the test coverage of the project.
- **Wagtail-Cookiecutter-Foundation**
A comprehensive starter template for the Django based Wagtail Content Management System. A cookiecutter template with a comprehensive suite of apps to use for building your site. The project uses Foundation Sass, Bower for package management, Deployment and provisioning using Ansible and Vagrant for easy setup of Development environment.
